

the matter concerning interconnection at a common location of certain types of "shared" and "community repeater" systems. See *First Report and Order*, Docket No. 20846, *supra*, at para. 47.<sup>8</sup> However, we want to be clear that we are looking towards settling these matters with respect to other systems in this phase of the proceeding; and that one alternative would be to adopt rules to permit interconnection under one or several of the options set forth in Subpart T of Part 89, subject, of course, to the limitations on interconnection at common locations mentioned above.<sup>9</sup>

5. Authority for the proposed amendments is contained in Sections 4(i) and 303 of the Communications Act of 1934, as amended. Pursuant to applicable procedures set forth in Section 1.415 of the Commission's Rules, interested parties may file comments on or before March 12, 1979, and reply comments on or before March 27, 1979. Relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

6. In accordance with the provisions of Section 1.419 of the Commission's Rules, an original and five copies of all statements, briefs, or comments filed shall be furnished the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C. 20554.

7. For further information concerning this rule making, contact John B. Letterman, Industrial and Public Safety Rules Division, Safety and Special Radio Services Bureau, Federal Communications Commission, Washington, D.C. 20554 (202) 632-6497.

FEDERAL COMMUNICATIONS  
COMMISSION,  
WILLIAM J. TRICARICO,  
*Secretary.*

JANUARY 17, 1979.

<sup>8</sup>In paragraph 47 of the *First Report and Order*, we stated that "... we will defer adoption of new rules directed to interconnection which is accomplished at the location of the shared radio equipment pending resolution of the proper regulatory status of a number of \* \* \* third party arrangements." This limitation would apply to any rules adopted to govern interconnection arrangements for private radio systems operating in the 800-MHz bands.

<sup>9</sup>See Sections 90.477 through 90.484 in new Part 90.

SEPARATE STATEMENT OF COMMISSIONER  
ABBOTT WASHBURN—RE: DOCKET 20846

The decision in Docket 18262 was the product of a variety of interactive compromises. It represents a delicate balancing of opposing views and interests. A significant change in one of the elements of that decision, therefore, e.g. the proposed change of limitations on "interconnection," could affect the viability of the entire decision. Rather than singling out this element for separate treatment, such a change might better be addressed in a comprehensive proceeding dealing with a range of issues surrounding the allocation of frequencies above 800 MHz.
